Professional Profile

Emerging user experience designer. Quick learner, self starter. Technology expert. Proficient in front-end design and database management. Enthusiastic about solving UXD problems and generating innovative solutions.

Education

Bachelor of Information

Faculty of Information, University of Toronto
Information Studies (2023-25)
Computational Linguistics (2020-23)

2025

(expected)

Representative Courses: Interactive Systems Design, Computational Reasoning,
Worlds Become Data, Integrated Approaches in Technology

Selected Projects

Interactive Restaurant Ordering Kiosk

2024

Course Project (Interactive Systems Design)

- Conducted market research by reviewing current consumer interfaces used to order at restaurants alongside public sentiment.
- Generated a variety of prototypes which were distributed for user testing and peer review, accounting for feedback.
- Created a final, interactive, high-fidelity prototype to represent our team's vision of the ideal restaurant kiosk for a major fast-food chain.

Website Modernization and Redesign

2022

Shooting Federation of Canada, Ottawa

- Ported over 200 web pages from the organization's dated site to a modern, responsive interface using Squarespace and HTML/CSS code.
- Overhauled a variety of high-traffic webpages to improve functionality – including the complete redesign of the National Shooting Team's information portal.
- Tasked to facilitate the database migration of over 1000 members from WildApricot to Squarespace.

Professional Experience

Website Designer

2023 - Present

Shooting Federation of Canada, Ottawa

- Responsible for the redesign, upkeep, and monitoring of organization website and website activity.
- Consult and assist management team with any technology related concerns, such as cybersecurity and systems maintenance.
